

How to wire indoor and outdoor electrical distribution boxes in Equatorial Guinea

Article Overview

Proper wiring of indoor and outdoor distribution boxes requires careful selection of location, wire sizing, grounding, protection devices, and adherence to safety standards.

Choosing the Right Distribution Box

- Indoor vs Outdoor: Indoor boxes can be made of plastic or steel, while outdoor boxes require higher IP/NEMA ratings for water and dust protection .
- Material: Steel is durable for harsh environments; plastic is lighter and suitable for dry indoor areas .
- Capacity: Select a box that matches the total load and number of circuits .

Location and Installation

- Height: Install the bottom edge at 1.5–1.8 meters above the ground for easy access .
- Environment: Avoid humid, corrosive, or flammable areas. Outdoor boxes must be waterproof and well-ventilated .
- Mounting: Use secure brackets or screws to prevent movement or tilting .

Wiring Method

- Incoming Lines: Typically a five-wire system: three-phase lines (A, B, C), neutral (...)
