

How to wire the inlet of the distribution box

Article Overview

Inlet wires are the main incoming power lines that connect to the distribution box's main terminals, providing electricity to all circuits safely and efficiently.

Understanding Inlet Wires

Inlet wires, also called main supply wires, bring electrical power from the utility or main service panel into the distribution box. These wires are typically phase (live), neutral, and ground. Correct connection ensures safe distribution of electricity to all branch circuits and prevents hazards like short circuits or overloads ().

Wire Color Coding and Specifications

- Phase (Live) wires: Usually brown or red; in three-phase systems, A-phase is yellow, B-phase green, and C-phase red ().
- Neutral wire: Typically blue.
- Ground wire: Green or green-yellow striped.
- Wire gauge: Must match the load; for lighting and sockets, 2.5mm² is common, while air conditioning or heavy appliances may require 4.0mm² ().

Connection Procedure

- Power Off: Ensure the main supply is completely turned off and verified with a tester ().
- Mount the Box: Secure the distribution box at an accessible height, level, and sta...
