

Huawei Mobile Fiber Optic Router

Article Overview

Huawei offers both mobile 4G/5G routers for portable internet and FTTR fiber optic solutions for high-speed home networks.

Huawei Mobile Routers

Huawei's mobile routers, also known as mobile Wi-Fi hotspots, are compact devices that provide internet access via cellular networks. They are ideal for travel, camping, or temporary setups where fixed broadband is unavailable . Key features include:

- **Connectivity:** LTE or HSPA+ networks, with some models supporting download speeds up to 300 Mbit/s and upload speeds up to 100 Mbit/s .
- **Wi-Fi Standards:** Most devices support 802.11ac, allowing multiple devices (up to 10) to connect simultaneously .
- **Battery Life:** Integrated batteries typically last 4–10 hours, with top models like the E5730 offering up to 16 hours and even a power bank function .
- **Portability:** Small, lightweight, and easy to carry; some models are designed for style-conscious users.
- **International Use:** Many Huawei mobile routers support multiple LTE bands and allow local SIM cards to avoid roaming fees .

Popular models include the Huawei E5783, which provides high-speed 4G connectivity and up to 6 hours of continuous operation on a 1500 mAh battery . Users report reliable performance, though battery life may be limited for extended use without charging
