

Installation Dimensions of Surface-Mounted Electrical Box

Article Overview

Surface-mounted electrical boxes typically range from 2" × 3" × 1-1/2" to 4" × 4" × 3-1/2", with variations in depth, material, and gang configuration depending on application and wire fill requirements.

Standard Sizes and Types

Single-gang boxes are the most common for one switch or outlet, usually measuring around 2 inches wide × 3 inches tall, with depths from 1-1/2 inches to 3-1/2 inches to accommodate different wire counts and device sizes . Multi-gang boxes allow multiple devices in one location and are available in gangable or non-gangable configurations, often with widths and heights scaled proportionally to the number of devices . Junction boxes are typically square, around 4" × 4", with multiple depth options to provide sufficient internal volume for splicing multiple wires . Round and octagon boxes are commonly used for ceiling-mounted fixtures such as lights or fans, with diameters generally ranging from 4 to 5 inches and depths from 1-1/2 inches to 2-1/2 inches . Surface-mounted boxes for specialized applications, including wireless or retrofit installations, may have dimensions like 4-1/2" × 4-1/2" × 4-1/2" or 7" × 4-1/2", depending on the device and mounting requirements .

Materials and Construction

Surface-mounted boxes are commonly made from flame- and impact-resistant polymers (ABS), heavy-gauge stainless steel, or aluminum, suitable for indoor and o...
