

International Energy Interconnection Cooperation

Article Overview

International energy interconnection cooperation promotes cross-border electricity networks to enhance energy security, integrate renewable energy, and support sustainable development globally.

Overview

International energy interconnection cooperation involves the development of cross-border electrical grids and collaborative frameworks that allow countries to share electricity resources efficiently, reduce carbon emissions, and improve energy security. These initiatives are particularly important for integrating renewable energy sources, balancing supply and demand, and mitigating the impact of extreme weather or power outages .

Key Organizations

- Global Energy Interconnection Development and Cooperation Organization (GEIDCO): Headquartered in Beijing, China, GEIDCO is an international platform with over 500 members from 80 countries, including firms, research institutions, and financial organizations. Its mission is to establish a global energy interconnection system to meet electricity demand in a clean and sustainable way, supporting the United Nations' Sustainable Energy for All and climate change initiatives .
- International Energy Agency (IEA): Collaborates with regional and global organizations such as APEC, ASEAN, the African Union, and IRENA to promote energ...
