

Introduction to the Brand of Somali Telecommunication Towers

Article Overview

Somali telecommunication towers are primarily operated by leading local telecom brands such as Hormuud Telecom, Somtel, and Golis Telecom, providing extensive mobile, internet, and digital services across Somalia.

Overview of Somali Telecom Infrastructure

Telecommunication in Somalia is largely driven by the private sector, with companies establishing extensive tower networks to provide mobile and internet services nationwide . These towers support voice, data, and digital services, enabling connectivity even in remote towns and rural areas. Somalia ranks among the most affordable countries in Africa for mobile data, reflecting the competitive and technologically advanced nature of its telecom sector .

Key Brands and Their Tower Networks

Hormuud Telecom: Founded in 2002 in Mogadishu, Hormuud has grown into a leading telecom provider in Somalia. Its tower network supports mobile calls, internet, and mobile money services. Hormuud was the first Somali company to introduce mobile money, gain licensing from the Somali Central Bank, and achieve GSMA Mobile Money Certification, highlighting its pioneering role in digital financial services .

Somtel: Somtel operates across multiple Somali regions, offering voice, data, and digital services. Its tower infrastructure is designed to empower communities with reliable connectivity and advanced digital solutions, reflecting a commitment to bot...
