

Is the 5700 a core switch

Overview

The Ryzen 7 5700 is an 8-core / 16-thread processor based on the Cezanne (2021–2025) architecture, manufactured on a 7 nm process node. It reaches a maximum boost clock of 4.7 GHz—higher boost clocks directly translate to better single-threaded performance. The HPE FlexFabric 5700 Switch Series is a family of high-performance, high-density, ultra-low-latency, top-of-rack (ToR) switches that is part of the Hewlett Packard Enterprise (HPE) FlexNetwork architecture's HPE FlexFabric solution. Thanks to AMD Simultaneous Multithreading (SMT) each core can process two instruction streams in parallel. The Ryzen 7 5700 is manufactured by AMD. It was released in 4 April 2022 (3 years ago). To make a right choice for computer upgrading, please get familiar. The AMD Ryzen 7 5700 processor, released in 2021, remains a popular choice for budget and mid-range builds by 2025.
