

KBG cable tray specifications

Article Overview

KBG cable trays are rigid, metallic conduits designed for electrical cable management, typically made of steel with various finishes, available in multiple widths and heights, and compliant with international standards.

Overview

KBG cable trays are a type of rigid metallic cable management system used to support and protect electrical cables in industrial, commercial, and residential installations. They are designed to provide mechanical protection, maintain cable organization, and allow for easy installation and maintenance.

Materials and Finishes

- **Material:** Typically made from mild steel, stainless steel, or aluminum depending on environmental requirements .
- **Finishes:** Options include hot-dip galvanization, powder coating, or bare steel, providing corrosion resistance and durability .
- **Corrosion Resistance:** Aluminum trays have a natural oxide layer for protection, while galvanized steel resists atmospheric corrosion .

Dimensions

- **Widths:** Common widths range from 50 mm to 600 mm, depending on cable load and installation requirements .
- **Heights:** Typical heights include 50 mm, 70 mm, 100 mm, and 120 mm
