

Landscape Lighting Distribution Box Configuration

Overview

A weatherproof box for landscape lighting must be sized according to NEC Article 314. 16, which limits box fill to specific percentages based on conductor size, wire nuts, and device volume. □ Quick Answer: An outdoor electrical junction box is a weatherproof enclosure where electrical wires connect or split, required by code to protect connections from moisture, provide safe access for maintenance, and prevent electrical hazards in exterior applications. Before stripping or connecting wires, ensure the transformer is unplugged. Never leave copper strands exposed at the transformer terminals, as "stray". Applications - The minimally invasive retrofit kit enables the opportunity existing remote power infrastructure cross arm, & wiring) providing the total cost of ownership. When you're cramming wire nuts, multiple conductors, and transformers into junction boxes, it's easy to exceed NEC wire fill limits—especially when you're running 12/2 or 10/2 wire from. Through-wiring within the luminaire is not possible for certain luminaires or connecting pillars. In this case, we recommend BEGA distribution boxes for installation in soil.
