

Latest Price List for Trunk Optical Cables

Article Overview

Trunk optical cables typically cost between \$30 and \$170 for a 10-meter MPO assembly, with prices varying by fiber count, connector type, and performance level.

Price Range Overview

- Standard MPO Trunk Cables: Around \$30 for a 10-meter, 12-fiber OM4 cable when purchased factory-direct, suitable for 10G or 40G networks .
- Premium MPO Trunk Cables (US Conec MTP® Elite): Approximately \$55 for the same 10-meter, 12-fiber OM4 cable, offering lower insertion loss and higher reliability for 100G or 400G deployments .
- Bulk Fiber Cable Materials: Retail prices range from \$1 to \$6 per foot, depending on fiber type (single-mode vs multimode), fiber count, and jacket construction . Wholesale bulk purchases can be lower, around \$0.09 to \$1.52 per foot .

Factors Affecting Cost

- Fiber Count: Higher fiber counts (e.g., 144, 288, or 864 fibers) increase cost due to more complex manufacturing and higher material usage .
- Connector Type: MPO/MTP connectors are more expensive than standard LC or SC connectors, and pre-terminated assemblies carry a premium over raw bulk cable .
- Cable Type: Single-mode (OS2) cables are generally cheaper per foot than multimode (OM3, OM4, OM5) but may require more expensive transceivers .
- Length: Trunk cables must be ordered to exact lengths; longer cables increase material and labor costs .
- Performance Requirements: Ultra-low loss (≤ 0.25 dB per connector) or high-bandwidth optimized cables cost more due to stricter quality control and testing
