

Line-side light module dimensions

Overview

Standard LED linear module specifications typically include 140mm, 280mm, 560mm, and 1120mm lengths, enabling luminaire manufacturers to rapidly match designs. Customizable modules in both dimensions and shapes are also available to meet OEM/ODM clients' requirements for. Note: Light flux varies with the temperature measured @Tc point; nominal values is given @Tc = Tp. Flux increases when Tc decreases. Note: All LINEARlight Flex LED strips are fully compatible with OSRAM OT and OTi LED drivers and dimmers. The lower the number of MacAdam ellipses, the better the color quality. Fortimo linear LED systems deliver 3 SDCM. An LED linear module is a lighting component specifically designed for linear fixtures and retrofitting existing lighting systems. Compared to traditional fluorescent tubes or ns with high efficiency levels. The Fortimo LED Line portfolio consists of 2 main ranges of products, which have been differentiated by the numbe of rows of LEDs on the module. Both ranges feature a variety of different length modules, lumen packages and color temperatures for all the diffe nd $\pm$. Dimensions of LED Line 1ft 3R (mm) Dimensions of LED Line 1ft 1R (mm) Dimensions of Xitanium LED driver Thank you for choosing the Philips Fortimo LED Line System. In this guide you will find the information you need to design this system into a luminaire.
