

List of Outdoor Distribution Boxes

Article Overview

Outdoor distribution boxes are classified by material, mounting type, and application, with options including plastic, metal, wall-mounted, and floor-standing enclosures designed for weather-resistant power distribution.

Material-Based Types

- **Plastic Distribution Boxes:** Made from engineered thermoplastics such as polycarbonate or ABS, these boxes are lightweight, corrosion-resistant, and provide good electrical insulation. They are ideal for residential installations, coastal areas, humid climates, and cost-sensitive projects .
- **Metal Distribution Boxes:** Constructed from galvanized steel, aluminum, or stainless steel, these enclosures offer superior mechanical protection, impact resistance, and durability. They are preferred for industrial sites, power substations, high-EMI zones, and extreme weather conditions .

Mounting and Installation Types

- **Wall-Mounted Boxes:** Common in residential, commercial, and light industrial applications, these boxes save floor space and provide easy access for maintenance .
- **Floor-Standing Boxes:** Used in larger electrical systems requiring more internal space, higher load capacity, or multiple circuits. These are typical in industrial and infrastructure projects .

Application-Specific Types...
