

Low-priced PoE switches

Article Overview

Affordable PoE switches under \$150 include NETGEAR GS308PP, TP-Link LS108GP, NETGEAR GS108PP, and Ubiquiti USW-Lite-8-PoE, offering reliable power delivery and connectivity for small networks.

Recommended Budget PoE Switches

- NETGEAR GS308PP – Ideal for IP cameras and small deployments, this 8-port switch provides standard PoE+ support, is quiet, and offers a practical power budget for two to four devices .
- TP-Link LS108GP – A strict-budget 8-port PoE switch, suitable for minimal setups where cost is the primary concern .
- NETGEAR GS108PP – Offers more power headroom than the GS308PP, making it suitable for slightly larger deployments or devices with higher PoE requirements .
- Ubiquiti USW-Lite-8-PoE – A low-cost managed switch compatible with UniFi networks; note that only four of its eight ports provide PoE+ .

Key Considerations

- PoE Standards: 802.3af delivers 15.4W per port, 802.3at (PoE+) delivers 30W, and 802.3bt (PoE++) is for high-power devices. For most cameras and Wi-Fi access points, PoE or PoE+ is sufficient .
- Total Power Budget: Choose a switch based on total wattage rather than just port count. For example, a 60W switch can power a few devices, while a 120W switch provides more flexibility for additional cameras or APs .
- Management: Unmanaged switches are plug-and-play and cost-effective, while managed or smart switches allow VLANs, QoS, and monitoring, which can be useful...
