

Madagascar Lighting Distribution Box Specifications and Dimensions

Article Overview

Lighting distribution boxes in Madagascar typically range from 400 x 500 x 200 mm for standard outdoor enclosures, with variations depending on type and application.

Standard Dimensions

For outdoor and low-voltage (LT) distribution boxes, common dimensions include 400 mm width, 500 mm height, and 200 mm depth, designed to accommodate multiple circuits and provide sufficient space for wiring and components . These boxes often comply with IP54 ratings for protection against dust and water ingress, and are constructed from durable materials such as ABS or metal for outdoor use .

Types and Variations

- TOP-TS, TOP-TF, TOP-LS, TOP-PS models: These are modular outdoor boxes with varying numbers of ways and mounting sizes, suitable for commercial and industrial lighting installations .
- XRM lighting distribution boxes: Lightweight, secondary distribution devices suitable for urban roads, residential areas, airports, and highways. They are designed for easy installation, high structural strength, and corrosion resistance .
- Customizable options: Many suppliers in Madagascar offer custom distribution boxes to match specific project requirements, including size, number of circuits, and internal layout
