

Madagascar tariff cost for 100G of photonics packaging

Article Overview

The standard import tariff in Madagascar is 15%, which would apply to photonics packaging unless a specific exemption or reduced rate applies.

Estimating the Tariff Cost

For 100 grams of photonics packaging, the import duty is calculated based on the CIF value (Cost, Insurance, and Freight) of the goods. Using the general tariff rate of 15%:

- If the CIF value of 100g of photonics packaging is, for example, \$500, the tariff would be $\$500 \times 15\% = \75 (Madagascar Customs) .
- Additional taxes or fees may apply depending on the product classification, import licenses, or regulatory requirements .

Product Classification and Documentation

To ensure accurate tariff calculation:

- Determine the HS code for photonics packaging, which is essential for customs classification and duty assessment .
- Required documents include:
 - Commercial Invoice
 - Bill of Lading or Airway Bill
 - Packing List...
