

Main Distribution Box Code

Article Overview

The main distribution box (MDB) can be classified using Uniclass code Pr_60_70_22 and must comply with IEC 60364, IEC 61439, and BS 7671 standards for safe installation and operation.

Classification and Code

The Uniclass code for distribution boxes and switchboards is Pr_60_70_22, which is part of the latest Uniclass 2026 classification system used in construction and building information modeling (BIM) to standardize product and component identification . This code helps architects, engineers, and contractors reference main distribution boxes consistently across projects.

Standards and Regulatory Codes

Main distribution boxes must comply with international and regional standards to ensure safety, reliability, and proper operation:

- IEC 60364: Provides guidelines for low-voltage electrical installations, including residential and commercial premises .
- IEC 61439: Specifies requirements for low-voltage switchgear and controlgear assemblies, including main distribution boards .
- BS 7671 (UK Wiring Regulations): Aligns with IEC standards and provides detailed requirements for installation, accessibility, protection, and environmental conditions .
- IEC 60529: Defines the IP (Ingress Protection) code for enclosures, ensuring protection against contact with live parts, dust, and water
