

Main distribution box dimensions

Article Overview

Main distribution boxes typically range from 200×200×120 mm to 800×600×300 mm for wall-mounted units, and 1600–2200 mm in height, 600–1800 mm in width, and 300–600 mm in depth for freestanding cabinets.

Wall-Mounted Distribution Boxes

For residential or small commercial applications, wall-mounted distribution boxes are common. Typical dimensions include:

- Height × Width × Depth: 200×200×120 mm up to 800×600×300 mm
- These sizes accommodate a range of circuits, DIN rails, busbars, neutral and earth bars, and allow space for cable entries and future expansion .
- The internal layout must consider heat dissipation, wiring space, and bend radius for cables .

Freestanding or Floor-Standing Panels

For larger commercial or industrial installations, freestanding distribution panels are used:

- Height: 1600–2200 mm
- Width: 600–1800 mm
- Depth: 300–600 mm
- These panels can house more circuits, higher-rated breakers, and additional protective devices such as surge protection or smart monitoring modules
