

Meaning of PDP distribution box

Overview

Acting as a secondary hub downstream from the Main Distribution Panel (MDP), a Power Distribution Panel (PDP) is responsible for distributing electrical power to specific, dedicated loads within a facility, such as machinery, lighting circuits, HVAC systems, and other equipment. A power distribution box is a key part of any electrical system. It takes electricity from the main source and safely sends it to different circuits in a home, office, or industrial setup. This document provides detailed information about the Conext SW Power Distribution Panels, which are pre-wired solutions designed to integrate SW inverter or chargers with MPPT Solar Charge I'd like to receive news and commercial info from Schneider Electric and its affiliates via electronic.
