

Method for Installing Fiber Optic Cables for Home Routers

Article Overview

Installing fiber optic internet at home involves connecting the fiber line to an Optical Network Terminal (ONT) and linking it to your router via Ethernet for high-speed internet access.

Step 1: Check Fiber Availability

Before installation, confirm that fiber service is available in your area by contacting your ISP or checking their website. Fiber networks may already pass nearby, or the provider may need to extend the network to your home .

Step 2: Fiber Drop Installation

The ISP technician brings the fiber cable from the neighborhood network to your home. This can be done via:

- Aerial service drop: Fiber runs from a utility pole to your home, connected to a small box called an MST .
- Underground service drop: Fiber is buried in a new tube or existing conduit to reach your home .

Step 3: Network Interface Device (NID) Setup

A NID is installed on the exterior of your home. It serves as the point where the fibe...
