

Middle East cable tray material customization price

Article Overview

Cable tray prices in the Middle East vary based on material, finish, size, and project specifications, with customization widely available from regional suppliers.

Material Options

Cable trays in the Middle East are manufactured using a variety of materials to suit different environments and load requirements:

- Galvanized Steel (GI): Common for indoor and semi-exposed areas, offering corrosion resistance and durability .
- Hot-Dipped Galvanized (HDG): Provides enhanced corrosion protection for outdoor or industrial applications .
- Stainless Steel (SS 304 / SS 316): Ideal for highly corrosive environments, chemical plants, or coastal areas .
- Aluminum: Lightweight and corrosion-resistant, suitable for commercial and industrial installations .
- GRP (Glass Reinforced Plastic): Non-metallic option for chemical resistance and electrical insulation .
- Wire Mesh / Basket Trays: Typically used for telecommunication and fiber optic cables, allowing airflow and easy cable management .
