

New Zealand Vertical Distribution Box Explosion-proof Specifications

Overview

The explosion proof enclosure range has Atex, IECEx, UL Certification s suitable for Zone 1, 2, 21 and 22 Hazardous Areas applications. The highlights: Up to four control elements can be mounted under a single actuator. • Voltmeters and ammeters withstand ambient temperatures as. • Flameproof enclosure (Ex db), which can be used as feed distribution equipment in control and distribution system (such as distribution box, switch box of main circuit, control box, terminal box or motor starting box etc.) Enclosure: 304 stainless steel, 316L stainless steel and Q235. • Equipped. Options range from Ex d (flameproof enclosure) to Ex e (increased safety) and Ex i (intrinsically safe) right through to Ex p (pressurized housing), as well as combinations of different explosion-protection types – always bearing in mind the most efficient solution for your application. BARTEC. B&R accreditation to ISO 9001 for the design, manufacture and distribution of electrical equipment for hazardous areas. We offer bespoke, custom-made terminal boxes and terminal box combinations, as well as standard products with short delivery times. Available with a wide range of built in components. Equipped with a specialised hinge structure which can prevent damage to the flameproof joints when opening and closing the box; greatly. Let's explore a safe future together. Choose our explosion-proof solutions, choose safety.
