

Niger explosion-proof distribution box specifications and models

Article Overview

Explosion-proof distribution boxes in Niger include HRMD91, HRMD92, HRMD96 series, and PXT/PZ/GCK/GGD models, with stainless steel or aluminum enclosures, flameproof ratings, and customizable configurations.

HRMD Series Overview

HRMD91, HRMD92, and HRMD96 are flameproof distribution boxes designed for hazardous environments:

- Enclosure Materials: HRMD91 uses copper-free aluminum with powder coating; HRMD92 and HRMD96 use 316L or 304 stainless steel for corrosion resistance and durability .
- Flameproof Ratings: HRMD91/92/96 are rated Ex d IIB+H2 or Ex db IIC T6...T41, suitable for gas and dust hazardous zones .
- Design Features: Specialized hinge structures prevent damage to flameproof joints during opening/closing, extending service life. Boxes can be combined or installed freely to save space .
- Internal Components: Can include MCBs, MCCBs, AC contactors, thermal relays, PLCs, soft starters, meters, pushbuttons, indicators, and surge protectors. Custom configurations are available based on user requirements .
- Cable Entry: Optional cable glands; DQM-II (Ex d) or DQM-III (Ex d) recommended. Users must specify direction and size of cable entries
