

OPGW Optical Cable Industry

Overview

In an increasingly connected world, OPGW (Optical Ground Wire) cables have emerged as critical enablers of next-generation power infrastructure, combining lightning protection and grounding functionality with high-bandwidth fiber optic communication. The Global OPGW Cable Market was valued at USD 1.93 Billion by 2030, growing at a Compound Annual Growth Rate (CAGR) of 6.7% during the forecast period (2024-2030). This robust growth trajectory stems from escalating investments in power grid. At the top of high-voltage transmission lines, a special optical cable integrating dual functions is silently supporting the stable operation of the energy network – this is the OPGW optical cable (optical fiber composite overhead ground wire). I need the full data tables, segment breakdown, and competitive landscape for detailed regional analysis and worldwide quality standards. Prysmian has a built-in multi-step quality assurance programme, which covers the entire production process from cable design and raw materials purchasing, to final inspection for any single project.
