

# Optical cable produced in Niger

## Overview

Niger has taken a major step forward in improving the country's broadband connectivity and regional digital integration by completing provisional acceptance of the fibre-optic sections built under the Trans-Sahara Optical Fibre Backbone Project (TSB) – a project financed by the. Niger has taken a major step forward in improving the country's broadband connectivity and regional digital integration by completing provisional acceptance of the fibre-optic sections built under the Trans-Sahara Optical Fibre Backbone Project (TSB) – a project financed by the. Niger's fibre-optic sections cover five key routes in the country: Arlit-Assamaka to the Algerian border; Diffa to N'Guigmi and the Chad border; Zinder to Magaria and the Nigerian border; Niamey to Dosso, Gaya and the Benin border; and Niamey to Makalondi and the Burkina Faso border. (Image/The. Find the latest exports, imports and tariffs for Optical fibres and cables trade in Niger. The project promises improved security through better communication and data management, but its impact on tourism remains limited until broader safety and infrastructure. We produce energy cables, telecommunications cables, railway and traffic cables, cables for renewable energies, industrial cables, automation cables, and special cables according to customer. With us, you will receive. The project has two major components: first, the construction of a 1,031-km national and cross-border fibre-optic network; and secondly, the installation of a Tier III national data centre.
