

Outdoor power distribution box outdoor installation price

Article Overview

The total cost for an outdoor complete power distribution box typically ranges from \$3,000 to \$6,000, depending on amperage, enclosure type, and installation complexity.

Cost Breakdown

Equipment Costs: Outdoor-rated distribution boxes are generally more expensive than indoor units due to weather-resistant construction, durable materials, and safety features. A 200A outdoor panel with a new meter socket can cost between \$1,500 and \$3,500 for the box and breakers alone, while smaller 100-125A units may range from \$800 to \$1,500. Advanced features like smart monitoring, lockable covers, or integration with building management systems can further increase the price.

Labor Costs: Installation typically requires 6-18 hours of electrician work, depending on the complexity of wiring, accessibility, and whether conduit rerouting or structural modifications are needed. Hourly rates for licensed electricians range from \$75 to \$120, with potential surcharges for rural locations, overtime, or difficult access.

Outdoor installations may require additional mounting hardware or pole/wall supports, adding to labor time.

Permits and Additional Fees: Local electrical permits are often required, which can add \$50-\$200 depending on jurisdiction. Urban areas may also include delivery or permit surcharges, while rural areas may incur transport fees for specialized panels.
