

PoE switch cannot connect to wireless AP

Overview

Check the switch which you are using has PoE option or not. If it powers up, first. All access points, except for three, are connected to the TP-link switches and mentioned with PoE. The controller is not a router; Mikrotik is used as a router. 12-18-2017 12:21 AM Guess you need to investigate the issue (s) below : 12-17-2017 07:33 AM - Connect to the AP over the network logon to enable mode and issue show logging ; watchout for errors concerning the current operational mode. Steps to troubleshoot AP power issues, including switch port capabilities / total load, per number of AP power requirements. What are Troubleshooting steps to perform when AP is not powering on by PoE?

ICX7250 24P R610 "AP intermittently powering ON/OFF" ICX does not correctly allocate PoE budget. To configure the EAP225, I used the passive POE injector that it came with and everything went great. When I mounted the EAP225 and plugged it into the POE+ switch I did not get any power to the AP.
