

# Pre-installed outdoor fiber optic patch cord

## Article Overview

Pre-installed outdoor fiber optic patch cords are factory-terminated, ruggedized cables designed for plug-and-play deployment in outdoor environments, offering high-speed, reliable connectivity with minimal installation effort.

### Overview

Pre-installed or pre-terminated outdoor fiber optic patch cords come with connectors already attached at both ends, eliminating the need for field termination. These cables are designed for direct burial, aerial, or conduit installations and are suitable for FTTH, FTTX, DAS, and campus networks . They are available in single-mode (OS2) and multimode (OM1, OM2, OM3, OM4, OM5) variants, supporting data rates from 1 Gbps up to 100 Gbps depending on fiber type .

### Key Features

- **Rugged Construction:** Outdoor patch cords often feature armored jackets (metallic or stainless steel mesh) or TPU/LSZH jackets for protection against UV, moisture, abrasion, and temperature extremes .
- **Pre-Terminated Connectors:** Common connector types include LC, SC, ST, and APC variants, with options for duplex or simplex configurations .
- **Pulling Eye or Pushable Design:** Many pre-installed cords include a swivel pulling eye or pushable connectors to reduce stress during installation and prevent fiber damage ....
