

Price List for All-Optical Switches

Article Overview

Optical switches typically range from around \$1 to over \$100 per unit, depending on type, application, and quantity.

Overview of Pricing

The cost of an optical switch varies widely based on its type and application:

- **Mechanical keyboard optical switches:** These are designed for consumer electronics and gaming keyboards. Prices generally range from \$1 to \$5 per switch when purchased individually, with bulk packs often offering lower per-unit costs (Amazon, Newegg) .
- **Industrial or sensor optical switches:** Used in automation, robotics, or electronics projects, these switches can cost \$5 to \$50 per unit, depending on specifications such as actuation distance, voltage, and durability (Mouser) .
- **Fiber optic switches:** These are specialized for telecommunications or data networks and are more expensive, typically ranging from \$50 to over \$100 per unit, depending on the number of channels, insertion loss, and switching speed (Digi-Key) .

Factors Affecting Price

- **Quantity:** Bulk orders often reduce the per-unit cost.
- **Type and specifications:** Mechanical, industrial, or fiber optic switches have different performance requirements and materials, affecting price.
- **Brand and quality:** Premium brands or high-precision switches cost more.
- **Shipping and tariffs:** For international orders, tariffs (e.g., 7-10% in the U.S.) may apply, increasing the final price (Mouser)
