

Price list of domestically produced high and low voltage distribution boxes

Article Overview

The cost of domestically made distribution boxes ranges from around \$150-\$2,000 for low-voltage residential panels and can exceed \$3,000-\$5,000 for high-voltage or large-capacity installations, depending on amperage, material, and labor.

Low Voltage Distribution Boxes

Low voltage distribution boxes, typically used for residential or light commercial applications (100-200A), generally cost \$150-\$1,500 including parts and labor. A basic indoor panel with standard breakers and wiring often falls between \$450 and \$1,000, while more complex setups with additional circuits, tamper-resistant features, or weatherproof enclosures can reach \$1,500. Per-breaker costs usually range from \$5 to \$25, and labor rates vary by region, typically \$50-\$150 per hour. Plastic single-gang boxes for outlets or switches are cheaper, around \$0.50-\$8 per unit, while metal or specialized boxes cost more.

High Voltage Distribution Boxes

High voltage or large-capacity distribution boxes, often used in commercial or industrial settings, can cost significantly more. For panels rated 200A or higher, total project costs including materials, labor, and potential service upgrades can range from \$3,000 to \$5,000 or more. Factors that increase cost include outdoor or weatherproof enclosures, corrosion-resistant hardware, complex wiring, meter base relocation, and code compliance requirements. Upgrading from a 100A to a 200A p...
