

Price of 24-core high-density fiber distribution box for smart buildings in the Gulf region

Article Overview

The price of a 24-core high-density fiber distribution box for smart buildings in the Gulf region typically ranges from \$50 to \$200 per unit, depending on brand, configuration, and environmental rating.

Overview

A 24-core fiber distribution box (FDB) is a key component in FTTx and smart building networks, providing secure splicing, termination, and distribution of fiber optic cables . These boxes are available in indoor and outdoor models, wall-mounted or pedestal-mounted, and can include features such as SC adapters, PLC splitters, and IP65-rated enclosures for weather protection . High-density models are designed to optimize space in telecom closets, corridors, or data centers.

Price Factors

- Brand and Quality: Well-known brands like Belden, Commscope, Panduit, Opterna, and Corning generally command higher prices due to reliability and warranty support .
- Environmental Rating: Outdoor or IP65-rated boxes with UV, dust, and water resistance cost more than standard indoor models .
- Configuration: Boxes with integrated splitters, adapters, or additional storage trays for fiber routing are priced higher....
