

Price of 8-core optical fiber cable

Article Overview

The price of an 8-core optical fiber cable typically ranges from \$0.50 to \$6 per foot, depending on fiber type, construction, and application.

Overview of Pricing

The cost of 8-core optical fiber cables varies widely based on several factors:

- **Fiber Type:** Single-mode cables (narrow core, $\sim 9\mu\text{m}$) are generally less expensive per foot than multi-mode cables (larger core, $50\text{--}62.5\mu\text{m}$) but require more costly equipment for transmission .
- **Construction:** Loose-tube outdoor cables with water-resistant gel or dry-core technology are more expensive than indoor tight-buffered or breakout cables . Armored or rodent-protected cables also increase costs .
- **Application Environment:** Outdoor, underground, or long-distance installations cost more than indoor or aerial runs due to additional protective features .

Typical Price Ranges

- **Wholesale Bulk Purchases:** \$0.09 to \$1.52 per foot for materials only, with bulk orders often reducing costs by 20–40% .
- **Retail or Small-Quantity Purchases:** \$1 to \$6 per foot, depending on fiber count, jacket type, and pre-termination .
- **Example:** A single-mode 8-core loose-tube outdoor cable may cost around \$0.50–\$2 per foot, while multi-mode or armored variants can reach \$3–\$6 per foot
