

Price of 90-degree diagonal elbows for cable trays

Article Overview

The price of a 90-degree cable tray elbow typically ranges from \$15 to \$100 or more, depending on material, size, and supplier.

Factors Affecting Price

- **Material:** Galvanized steel elbows are generally the most cost-effective, while stainless steel (304/316) and aluminum options are more expensive due to corrosion resistance and durability. PVC elbows are usually cheaper but suitable only for non-industrial environments.
- **Size and Load Capacity:** Larger elbows designed for wider trays or heavier cable loads cost more. Ensure the elbow matches the width, depth, and side height of your existing cable tray.
- **Standards Compliance:** Elbows meeting UL, NEMA, or IEC standards may carry a premium due to verified safety and performance ratings.
- **Supplier and Quantity:** Bulk orders from suppliers like Alibaba or industrial distributors can reduce per-unit cost, while single purchases from specialty suppliers may be higher.

Typical Price Ranges

- Small to medium galvanized steel elbows: \$15-\$40 per unit
- Stainless steel or high-load elbows: \$50-\$100+ per unit
- PVC or lightweight aluminum elbows: \$10-\$30 per unit...
