

Price of Indoor Distribution Box with Electricity Meter

Article Overview

Indoor electricity meters typically cost \$600–\$2,000, while distribution boxes range from \$50 to \$300 depending on features and amperage.

Indoor Electricity Meter Box Costs

Indoor electric meter boxes are protective housings for utility meters and are essential for monitoring electricity usage. Residential indoor meter boxes generally cost between \$600 and \$2,000, with most homeowners paying \$1,000–\$1,400 depending on amperage, materials, and installation conditions. Higher-rated units, such as 200A or weatherproof boxes, are at the upper end of this range. Industrial or custom enclosures can cost \$5,000–\$12,000+, depending on specifications and site requirements. Installation costs, permits, and inspections are additional factors that influence the total price.

Distribution Box Costs

Indoor distribution boxes, which house circuit breakers and provide multiple outlets, are generally more affordable. For example, a 110V, 60A power distribution box with built-in electricity meter and circuit breakers is available for around \$100–\$200 on online marketplaces. Prices vary based on the number of sockets, amperage rating, waterproofing, and certifications. Smaller or simpler units may cost as low as \$50, while larger, high-amperage, or specialized boxes can reach \$300 or more
