

Price of Level 3 Distribution Box for Bolivia Construction Sites

Article Overview

Level 3 Distribution Boxes for construction sites typically range from \$250 to \$600 USD, depending on specifications, current rating, and supplier.

Overview

Level 3 Distribution Boxes, also known as tertiary or construction spider boxes, are used to distribute power to tools, small machinery, and temporary lighting at construction sites. They are designed for three-phase power supply and can include industrial sockets, terminal blocks, and energy meters depending on site requirements. Common materials include steel, thermopolymer, or fiberglass, with protection ratings from IP65 to IP67 for outdoor use.

Price Range

- Basic models (32A-63A, pre-wired, standard sockets) are generally priced around \$250-\$350 USD per unit.
- Higher-capacity or customized models (100A, multiple sockets, energy meters, waterproof or fire-resistant enclosures) can cost \$400-\$600 USD or more.
- Prices from Alibaba or Made-in-China suppliers provide a reference for international procurement, but shipping, import taxes, and local distributor margins in Bolivia may increase the final cost.
