

Price of Middle Eastern steel trough-type cable trays

Article Overview

Steel trough-type cable trays in the Middle East vary in price depending on material, duty rating, finish, and supplier, with costs influenced by specifications and project requirements.

Overview of Steel Trough-Type Cable Trays

Steel trough-type cable trays are widely used in industrial, commercial, and infrastructure projects across the Middle East. They are designed to support and protect electrical cables while allowing ventilation and easy maintenance. Common materials include mild steel (MS), hot-dip galvanized steel (HDG), pre-galvanized steel, and stainless steel (304/316), with finishes such as powder coating, epoxy coating, or painted surfaces to enhance corrosion resistance .

Duty Ratings and Specifications

- Light Duty: Suitable for lightweight cabling such as networking, fiber optics, and data cables.
 - Medium Duty: Used in commercial applications with moderate cable loads.
 - Heavy Duty / Extra Heavy Duty: Designed for industrial environments with high cable density and weight.
 - Standard Lengths: Typically 3 meters, with custom lengths available on request .
- Trough-type trays are often preferred for their solid bottom design, which provides better protection for sensitive cables compared to ladder-type trays, especially in in...
