

Price of Vertical Cable Tray Side Supports

Article Overview

Vertical cable tray side supports typically range from \$20 to \$150 per unit, depending on material, size, and load capacity.

Factors Affecting Price

Material: Supports are made from steel (galvanized or powder-coated), stainless steel, or glass-fiber reinforced polyester (GRP). Steel supports are generally more affordable, while stainless steel and GRP offer higher corrosion resistance and durability, increasing cost . **Size and Load Capacity:** The length, width, and load-bearing capacity of the support significantly influence price. Supports designed for heavy-duty industrial or data center applications cost more than standard wall-mounted or light-duty brackets . **Design and Customization:** Modular or adjustable supports, including cantilever, L-type, V-type, or reinforced brackets, are priced higher due to flexibility and ease of installation . Customizable supports for unique geometries or IoT integration may further increase cost . **Brand and Certification:** Products from established brands like Kable Kontrol, ERICO, or McMaster-Carr may carry a premium. UL-listed or IEC-compliant supports are often more expensive due to safety and quality certifications .

Typical Price Ranges

- Light-duty wall-mounted supports: \$20-\$50 per unit
- Medium-duty steel or zinc-plated supports: \$50-\$100 per unit
- Heavy-duty or stainless steel supports with high load capacity: \$100-\$150+ per unit...
