

Price of a Precision Display Cabinet Primary Production Line

Article Overview

A fully automated precision display cabinet production line typically costs between \$150,000 and \$500,000, depending on equipment configuration, automation level, and production capacity.

Overview of Production Line Components

A precision display cabinet production line generally includes:

- **CNC Cutting and Forming Equipment:** Nesting CNC machines for precise cutting of boards and panels, often with multiple spindles for automated tool changes to improve efficiency .
- **Six-Sided CNC Drilling Machines:** Advanced drilling systems capable of processing multiple sides of a panel simultaneously, reducing labor and increasing throughput .
- **Panel Saw Cutting Equipment:** High-precision saws for cutting large boards into required sizes, ensuring consistent dimensions for assembly .
- **Automation and CAD/CAM Integration:** Systems for labeling, feeding, slotting, nesting, and unloading, which streamline production and reduce waste .
- **Optional Features:** Lighting, electronics, or motion systems for specialized display cabinets can increase costs .

Cost Factors

The total price of a production line depends on several variables:...
