

Price of a standard household outdoor electrical distribution box

Article Overview

A standard household outdoor electrical distribution box typically costs between £50 and £250, depending on specifications and features.

Typical Price Range

For residential outdoor use, basic single-phase distribution boxes generally start around £50-£100, while more robust, weather-resistant units with higher amperage or multiple circuits can range from £150-£250. Prices vary based on material (plastic vs. metal), number of circuits, and compliance with safety standards.

Factors Affecting Cost

- Amperage and Voltage Rating: Higher-rated boxes for larger loads cost more.
- Number of Circuits: More circuits increase complexity and price.
- Material and Durability: Outdoor-rated, weatherproof enclosures are more expensive than indoor-rated units.
- Safety Features: Lockable covers, fuse compatibility, and compliance with standards like BS88 or BS 7654 add to cost.
- Installation Requirements: Wall-mounted or pole-mounted units may require additional hardware or professional installation, affecting total cost.
