

Price of cable ties for cable tray fixing

Article Overview

Cable tray fixing ties typically range in price depending on size, material, and quantity, with bulk orders offering the most cost-effective options.

Overview of Cable Tray Fixing Ties

Cable tray fixing ties are specialised zip ties designed to secure cables to cable trays without additional fasteners. They are commonly made from UL-approved Nylon 66 (94V-2), providing high tensile strength (around 55kg) and durability in demanding environments such as industrial, commercial, and electrical installations. Standard dimensions for these ties are 320mm in length and 7.6mm in width, suitable for larger cable bundles.

Key Features

- **Snap-apart design:** The tie separates into a strap and buckle, which fit into standard cable tray slots, eliminating the need for screws or clips.
- **Durability:** Resistant to heat, moisture, and UV exposure, ensuring long-term performance.
- **Colour:** Most cable tray fixing ties are available in black, though some suppliers offer natural or other colours.
- **Applications:** Ideal for electrical installations, telecommunications, aerospace systems, and control panel builds.
