

Price of cable trays with bend joints

Article Overview

Cable tray bend joints typically range from £5 to £50 per piece in the UK, depending on material, size, and duty rating.

Price Overview

- **Medium Duty Pre-Galvanised Steel Bends:** These are commonly used for standard industrial and commercial installations. Prices generally start around £5-£15 per 90° bend for smaller sizes, with larger or heavier bends costing more. Suppliers like Shop4 Electrical offer next-day delivery for orders over £100 ex VAT .
- **Heavy Duty Hot-Dipped Galvanised (HDG) Steel Bends and Tees:** Designed for industrial or high-load applications, these bends are more robust and corrosion-resistant. Prices typically range from £20-£50 per piece, depending on the tray width and complexity of the bend (e.g., flat tee bends for 100mm trays), .
- **Stainless Steel 304 or 316 Bends:** Used in corrosive environments or outdoor installations, these are more expensive due to material costs. Expect prices starting around £30-£50 per bend, with larger or custom bends costing more .
- **PVC Cable Tray Bends:** Lightweight and corrosion-resistant, PVC bends are generally cheaper, often £5-£15 per piece, but are suitable only for light-duty applications .

Additional Considerations

- **Bulk Orders:** Many suppliers offer trade or bulk pricing, which can reduce the per-unit cost significantly. Contacting suppliers directly is recommended for large projects
