

Price of lightning protection for distribution boxes

Article Overview

Lightning protection equipment for distribution boxes typically ranges from \$50 to \$500 per unit, depending on specifications, type, and installation requirements.

Price Range Overview

The cost of lightning protection equipment varies widely based on the type of device and its technical capabilities. Basic surge protection devices (SPDs) for small distribution boxes can start around \$50–\$100 per unit, while more advanced integrated lightning protection boxes with higher discharge capacity, IP-rated enclosures, and IoT monitoring features can range from \$200 to \$500 or more . Wholesale or bulk orders often reduce per-unit costs, and custom or OEM solutions may increase prices .

Factors Affecting Cost

- **Technical Specifications:** Voltage rating (AC or DC), nominal discharge current (I_n), and maximum discharge current (I_{max}) directly influence price. Higher kA ratings for surge absorption increase cost .
- **Ingress Protection (IP) Rating:** Outdoor or harsh environment boxes with IP65, IP66, or IP67 ratings are more expensive due to enhanced dust and water resistance .
- **Material and Build Quality:** Enclosures made from polycarbonate, fiberglass-reinforced polyester, or heavy-gauge steel with UV stabilization and thermal resistance are priced higher .
- **Type of Protection:** Internal SPDs, external lightning arresters, or combined units...
