

Price of optical fiber splice boxes in West Asia

Article Overview

Optical fiber splice boxes in West Asia typically range from USD 15 to USD 120 per unit, depending on type, capacity, and environmental protection features.

Pricing Overview

The cost of fiber optic splice boxes varies widely based on capacity, design, and durability. Basic indoor splice boxes with 12–24 cores generally start around USD 15–30 per unit, while outdoor, waterproof, or high-capacity boxes (up to 144–576 fibers) can range from USD 80 to USD 120 or more per unit. Boxes with IP65 or higher ratings for protection against dust and water, or those made from rugged polycarbonate or metal, command higher prices due to enhanced durability.

Factors Affecting Price

- **Capacity:** Higher fiber counts require larger enclosures and more splice trays, increasing cost.
- **Material and Durability:** Metal or UV-resistant plastic boxes for outdoor use are more expensive than standard indoor plastic boxes.
- **Environmental Protection:** Waterproof and weather-resistant designs (IP65–IP67) are essential for harsh climates, common in West Asia, and add to the price.
- **Supplier and Procurement:** Wholesale purchases from manufacturers in China or regional distributors can reduce unit costs, especially for bulk orders.
