

Price of protective panels for construction site electrical distribution boxes

Article Overview

Installing protective panels for electrical distribution boxes typically costs between \$1,300 and \$3,000, depending on panel type, amperage, labor, and additional safety features.

Typical Cost Ranges

- Residential panels: For standard single-family homes, installing a protective panel or upgrading a distribution box generally ranges from \$1,305 to \$1,581 for mid-range work, including materials and labor ().
- Electrical panel replacement or upgrade: Costs vary widely depending on amperage and complexity. A 100–150 amp panel installation can cost \$800–\$1,500, while a 200 amp panel may range from \$1,500–\$3,000 ().
- High-capacity or commercial panels: For larger or three-phase distribution boxes, costs can increase significantly due to higher amperage, advanced safety features, and specialized enclosures ().

Factors Affecting Cost

- Panel Type and Amperage: Higher amperage panels or specialized subpanels increase both material and labor costs ().
- Protective Features: Weatherproof, fire-resistant, or smart monitoring panels add to the upfront cost but improve safety and long-term reliability ().
