

Price of secondary distribution box in building

Article Overview

The cost of a secondary distribution box typically ranges from \$200 to \$2,500, depending on type, capacity, materials, and installation requirements.

Equipment Cost

The price of the distribution box itself varies widely based on size, material, and features. Small plastic units can cost as little as \$20-\$150, while industrial-grade metal boxes with higher amperage and advanced safety features can reach \$2,000 or more . Typical sub-panels for residential or garage use, such as 60-100 amp panels, usually range from \$20 to \$350 for the box alone .

Installation and Labor

Professional installation is a significant part of the total cost. Labor, wiring, permits, and inspections can add \$500-\$2,500 depending on complexity, location, and amperage . Factors influencing installation costs include:

- Panel amperage: Higher amperage panels cost more due to larger breakers and wiring requirements.
- Location: Outdoor panels or hard-to-access areas increase labor costs.
- Wiring length and complexity: Longer runs or rerouting existing circuits add to material and labor expenses.
- Permits and inspections: Local regulations may require permits, which vary in cos...
