

Price of steel structure cable trays in the Middle East

Article Overview

Steel cable trays in the Middle East typically range from \$20 to \$150 per meter depending on type, material, and load capacity.

Overview of Steel Cable Trays

Steel cable trays are widely used in industrial, commercial, and infrastructure projects across the Middle East due to their strength, durability, and corrosion resistance. Common types include ladder trays for heavy-duty applications, perforated trays for ventilation, and solid-bottom trays for sensitive cables. Materials often include galvanized steel, stainless steel (grades 304 or 316), and epoxy-coated steel to withstand harsh climates, high humidity, and coastal environments .

Price Factors

The cost of steel cable trays varies based on several factors:

- Type and design: Ladder trays are generally more expensive than perforated or solid-bottom trays due to higher material usage and load capacity .
- Material grade: Stainless steel trays (304/316) and marine-grade options for coastal areas command higher prices than standard galvanized steel .
- Load capacity: Heavy-duty trays for industrial or oil and gas applications cost more than light or medium-duty trays used in commercial buildings .
- Length and customization: Standard lengths are usually 2-3 meters, but custom l...
