

Price quote for fire-resistant galvanized cable trays

Article Overview

Fire-resistant galvanized cable trays typically range from \$0.76 to \$1.09 per meter, depending on quantity, supplier, and specifications.

Pricing Overview

The cost of fire-resistant galvanized cable trays varies based on material type, coating, size, and order volume. For example, hot-dip galvanized steel trays with fire-resistant properties are commonly used in industrial and commercial installations due to their durability and corrosion resistance. Prices for bulk orders can be lower, with suppliers offering rates such as \$0.76 per meter for large-scale industrial projects and around \$1.09 per meter for smaller quantities.

Factors Affecting Price

- **Material and Coating:** Hot-dip galvanization combined with fire-retardant coatings increases both fire resistance and corrosion protection, which can slightly raise costs.
- **Tray Type and Size:** Trough, ladder, or covered designs, as well as width and height, influence pricing. Standard lengths are usually 3 meters, with some suppliers offering 6-meter options.
- **Quantity and Supplier:** Bulk purchases often reduce the per-meter cost. Reputable suppliers like Weifang Guqiang, BXYC, and Langfang Rongxing provide competitive pricing for enterprise procurement
