

Price quote for imported optical interface modules

Article Overview

Imported optical interface modules can range from around \$10 for basic SFP modules to several hundred dollars for high-speed or branded OEM modules.

Price Ranges

- Basic SFP modules: \$10–\$50, typically for standard 1G or 10G modules from third-party manufacturers .
- High-speed SFP+ or QSFP28 modules: \$100–\$500 or more, depending on speed (10G, 25G, 40G, 100G), technology, and brand .
- OEM branded modules (Cisco, Juniper, Arista): Often carry a premium due to certification, support, and brand reputation, sometimes costing 2–3 times more than compatible third-party modules .

Factors Affecting Cost

- Brand and Vendor Reputation: Premium brands charge more for guaranteed compatibility, extensive testing, and support services .
- Technology and Speed: Newer, higher-speed modules (e.g., 100G QSFP28) require advanced engineering, specialized materials, and rigorous testing, increasing cost .
- Compatibility and Certification: OEM modules undergo strict vendor-specific qualification processes, which add to the price .
- Supply Chain and Logistics: Import costs, shipping, and availability of critical components can influence pricing, especially during shortages or geopolitical disruptions
