

Prices of Swedish-style cable trays

Article Overview

Swedish cable trays typically range from approximately 200 SEK to 2,500 SEK per meter, depending on type, material, and specifications.

Overview of Cable Tray Types and Materials

Cable trays in Sweden are available in several types, including ladder, perforated, and solid-bottom trays, and are manufactured from galvanized steel, stainless steel, aluminum, and composite materials such as FRP/GRP . Ladder trays are commonly used for heavy cable loads, while perforated and solid-bottom trays are suitable for lighter or specialized installations . The choice of material and tray type significantly affects the price, with stainless steel and composite trays generally costing more due to corrosion resistance and durability .

Price Factors

- **Material:** Galvanized steel is the most cost-effective, while stainless steel and composites are premium options .
- **Tray Type:** Ladder trays for heavy-duty applications are more expensive than perforated or solid-bottom trays .
- **Dimensions:** Wider and taller trays with higher load capacity increase the cost per meter .
- **Special Features:** Fire-resistant coatings, smart cable management integration, and compliance with EU construction product regulations (CPR) can raise prices .
- **Project Scale:** Custom or large-scale industrial projects may involve additional costs for tailored solutions and installation accessories
