

# Pz30 distribution box

## Article Overview

A PZ30 distribution box is a low-voltage modular electrical enclosure used for safe power distribution, circuit protection, and control in residential, commercial, and industrial settings.

### Overview

The PZ30 distribution box is designed to manage and protect electrical circuits by housing components such as circuit breakers, switches, busbars, and terminal blocks . It is commonly used in 220V/380V AC systems and supports both single-phase and three-phase configurations, with total current ratings typically up to 100A . The PZ30 designation refers to a standardized series of low-voltage distribution boxes that are modular, allowing for easy expansion and customization .

### Key Features

- **Modular Design:** The PZ30 box is often 9mm modular, enabling flexible installation and easy integration with additional modules or transformers .
- **Safety and Protection:** It provides triple protection against overload, short circuit, and leakage, and is constructed with fire-resistant materials to prevent hazards .
- **Durability:** Made from strong materials such as polycarbonate or metal, the box is resistant to heat, corrosion, and aging, ensuring long-term performance .
- **Installation Options:** Available in exposed (M) and concealed (R) installation types, suitable for walls or embedded setups .
- **User-Friendly:** Features like transparent covers, adjustable modular slots, and mounting rails simplify wiring, maintenance, and monitoring ....
