

QSFP optical module price quote

Article Overview

Custom QSFP optical module prices vary widely, typically ranging from a few hundred to tens of thousands of dollars depending on speed, reach, OEM vs third-party, and bespoke features.

Standard Pricing Overview

QSFP modules come in various speeds and types, such as 40G, 100G, 400G, and 800G. Pricing depends heavily on module type and transmission distance. For example, a 400G SR8 short-reach module from a reputable third-party vendor costs around \$1,400-\$1,800, while long-haul coherent ZR+ modules from OEMs can exceed \$130,000 . Third-party 800G QSFP-DD modules are typically 60-70% of OEM list prices, reflecting a maturing but still consolidated market .

Customization Factors

Custom QSFP modules can include features such as:

- Bespoke coding and thermal optimization for specific hardware compatibility and heat management .
- Extended transmission distances (e.g., 150m, 300m, 2km, 10km, 20km) using multimode or single-mode fibers .
- Special connectors like MPO/MTP or Duplex LC for breakout or parallel applications .
- Custom labeling, packaging, or firmware for enterprise or OEM branding . These customizations increase the final cost because additional engineering, testing, and production steps are required beyond standard modules
